

PIYUSH KALRA

Flutter Developer | Android & iOS App Developer

Jaipur, India | +918949581867 | piyush.kumar.kalra@gmail.com

Portfolio: <https://piyushkalra1.github.io/piyush-portfolio/>

PROFESSIONAL SUMMARY

Flutter Developer with 4 years of experience (since October 2022) building scalable Android and iOS applications using Flutter and Dart. Delivered 15+ production applications published on Google Play Store and Apple App Store with a combined reach of 100K+ downloads. Experienced in leading development teams, mentoring Flutter developers, handling direct client communication, gathering requirements, and delivering end-to-end mobile solutions from architecture to deployment.

WORK EXPERIENCE

Flutter Developer — Inventco Software Pvt. Ltd., Jaipur | Aug 2024 – Present

- Led Flutter development for Android and iOS applications from development to production.
- Managed a team of Flutter developers, conducted code reviews, and mentored junior engineers.
- Handled direct client meetings, requirement gathering, sprint planning, and solution discussions.
- Built scalable applications using Flutter, MVVM, Clean Architecture, Firebase, REST APIs, and Bloc/GetX.

Flutter Developer — Solvebee IT Services Pvt. Ltd. | Feb 2023–Aug 2024

- Developed and maintained multiple production Flutter applications across healthcare, insurance, and hospitality domains.
- Improved application performance, fixed production issues, and delivered new features in Agile sprints.
- Published and maintained Android and iOS applications on the Play Store and App Store.

Flutter Intern — Aimerse Technology | Oct 2022–Dec 2022

- Developed responsive Flutter UI and integrated REST APIs using Provider.
- Collaborated with senior developers on feature implementation, testing, and bug fixing.
- Gained hands-on experience with Flutter architecture and production app development.

- **Frameworks & SDKs:** Flutter (Android & iOS), GetX, Provider, BLoC
- **Backend & Database:** Firebase (Authentication, Firestore, Realtime Database, Cloud Messaging, Crashlytics, Analytics, Dynamic Links), Supabase, RESTful APIs
- **Payment Gateways:** Razorpay, Stripe, CCAvenue, Mollie, Google Pay, Apple Pay
- **Local Storage:** SharedPreferences, Flutter Secure Storage, SQLite, Hive
- **Architecture:** MVVM, Clean Architecture, SOLID Principles, Reactive Programming, Repository Pattern
- **Dev Tools:** Android Studio, VS Code, Xcode, Postman, Flutter DevTools, Figma
- **Version Control & CI/CD:** Git, GitHub, GitHub Actions, Google Play Console, Apple App Store Connect, Apple Developer Console
- **Other:** Responsive UI Design, MediaQuery, Adaptive UI, Performance Optimization, Push Notifications (FCM & PushKit), Deep Linking, Google Maps, Third-Party SDK Integration, Agora Video/Voice Calling, NFC, RFID, App Publishing (Google Play Store & Apple App Store)

EDUCATION

- Bachelor of Science — Raj Rishi Bhartrihari Matsya University
- Higher Secondary Education (PCM) — RBSE

CERTIFICATIONS

- Udemy — Flutter Development Bootcamp
- Aimerse Technology — Internship Certificate
- Government RSCIT Certificate

FEATURED PROJECTS

Dunnnit

- Developed a production-grade Flutter application from scratch using MVVM and Clean Architecture.
- Integrated REST APIs, In-App Purchases, Firebase Dynamic Links, Push Notifications, and Real-Time Chat.
- Built a challenge-based platform where users can create, join, and track personal or community challenges through a daily check-in system.
- Implemented advanced animations and optimized performance to deliver a smooth, engaging user experience.

ProbusInsurance

- Developed a Flutter-based insurance platform for Android & iOS supporting Car, Bike, Health, Home, and Marine insurance.
- Integrated REST APIs, secure authentication, FCM notifications, session management, and local storage.
- Implemented policy browsing and seamless insurance purchase workflows with payment gateway integration.

RAS Club (Government)

- Developed a Flutter-based booking platform for RAS members to reserve rooms, party halls, banquet halls, and conference halls.
- Integrated REST APIs, Razorpay payments, session management, and responsive UI/UX for seamless booking.
- Implemented booking management workflows and administrative features for efficient reservation handling.

Spelenderwijs — Korfball Management & Training Platform

- Developed a Flutter-based Korfball management platform for players, trainers, and administrators.
- Implemented team/player management, training schedules, match planning, session tracking, and performance statistics.
- Built role-based workflows for Admin, Trainer, and Player, including trainer–player communication features.

ADDITIONAL PROJECTS

Nawi • Planit • BetterLetterBook • CashinTransit

- Delivered multiple production-grade Flutter applications across healthcare, planning, education, finance, and enterprise domains.
- Contributed to UI/UX development, REST API integration, authentication, state management, local storage, notifications, and third-party integrations.
- Worked across the complete development lifecycle including feature development, debugging, performance optimization, testing, and production deployment.
