Profile

Flutter Developer Flutter Developer with 3.3+ years of experience in cross-platform mobile app development using Flutter & Dart. Skilled in UI/UX design, REST API integration, responsive design, testing/debugging, Agile/Scrum methodology, CI/CD, and deploying apps to Play Store and App Store. Adept at state management (Provider, GetX, Bloc), Firebase services, payment gateway integration, and delivering scalable, user-centric applications.

Employment

Flutter Developer (Aug 2024 - Present)

Inventco infotech, Jaipur

- Developed and maintained mobile applications using Flutter framework to enhance user experience.
- Mentor interns, review code, and provide guidance on Flutter best practices.
- Coordinate deployments, implement new features, and optimize app performance for Android and iOS.
- Collaborate with cross-functional teams to deliver high-quality, user-friendly applications.
- Develop and maintain the Krat-Easy Challenge App and Cash in Transit App from concept to deployment.

Flutter Developer (Feb 2023 - Aug 2024)

Solvebee It Services Pvt Ltd., Jaipur

- Designed and developed mobile applications including Bonanza Care, Bonanza Touch, Probus Insurance, and RAS Club.
- Built applications from scratch and enhanced existing apps with new features, bug fixes, and performance improvements.
- Integrated REST APIs, payment gateways (Razorpay, Stripe, CCAvenue), and implemented MVVM architecture with Provider and GetX.
- Deployed apps to Play Store and App Store while ensuring responsive UI and seamless performance.
- Managed push notifications, image notifications, and background tasks for iOS and Android.

Flutter Internship

Aimerse Technology

- Worked on UI/UX design, API integration, third-party library integration, and state management using MVVM with Provider.
- Contributed to development of mobile app features and collaborated with senior developers.

Technical Skills

· Programming: Flutter (Android, iOS), Dart, REST APIs, JSON · Tools: Git, GitHub, CI/CD, Xcode, Android Studio
· Architecture & State Management: MVVM, Provider, GetX, Bloc · Databases & Storage: Firebase Firestore
Hive, Shared Preferences, Secure Storage · Features: In-App Purchases, Push Notifications, Dynamic Links,
Real-time Chat, Animations, Maps, Social Logins (Google, Facebook, Apple) · Payment Gateways: Razorpay,
CCAvenue, Viva · Other: Responsive UI/UX Design, Agile/Scrum, Testing & Debugging

Achievements & Certifications

- · Flutter Internship – Aimerse Technologies · Flutter Development Bootcamp with Dart
- · Probus Insurance Certificate · Govt Approved RSCIT Certificate

Ras Club (Government Project)

Developed a booking platform for government RAS members to reserve rooms, party halls, banquet halls, and conference halls.

Responsible for implementing UI/UX design, session management, REST API integration, and Razorpay payment gateway for seamless booking and payments.

DUNNNIT

One of my most advanced Flutter projects developed completely from scratch.

Implemented REST APIs, In-App Purchases, Firebase Dynamic Links, Push Notifications, Real-Time Chat, and complex animations.

The application allows users to create challenges with friends and communities and includes a daily check-in system to track challenge progress and completion.

<https://play.google.com/store/apps/details?id=com.app.dunnnit.challenge.android>

Probus Insurance

Developed a complete insurance platform for Android and iOS supporting multiple insurance products including car, bike, health, home, and marine insurance.

Handled UI/UX design, session management, REST API integration, FCM push notifications, and local storage. Users can browse policies and purchase insurance easily through the app.

Event Manager App

Responsible for implementing UI/UX design, contact integration, REST API integration, and event sharing functionality. Users can create events, add members directly from phone contacts, and share event invitations with participants through share links.

Google Play:

<https://play.google.com/store/apps/details?id=com.vga.nawi>

LinkTaxi (Ride Booking App)

Developed a ride-booking mobile application similar to Uber that allows users to book rides and reach their destination easily.

Responsible for implementing UI/UX design, REST API integration, real-time driver tracking, and trip management.

Implemented WebSocket-based real-time communication for live driver location updates and ride status tracking. This application is currently used in the **Mozambique region** for ride-hailing services.

Google Play:
